

U.S. House of Representatives
Capitol Hill
Washington, DC 20515

October 14, 2019

Dear Member of Congress:

As faith organizations across the country and representing a wide spectrum of religious traditions, we urge you to support the 100% Clean Economy Act of 2019. This legislation would mitigate the worst impacts of climate change, transition the country to cleaner sources of energy, set the important goal of reaching net-zero emissions by 2050, and ensure that there is a just transition of jobs for the future wellbeing of our communities.

Through our faith we are united behind common moral values that prioritize protecting vulnerable populations, defending our children's health, caring for God's creation, and fulfilling our obligations to future generations. It is through this lens that we view climate change and recognize that this threat is already causing destruction, despair and displacement.

We know that the impacts of climate change are not felt equally across communities. Vulnerable populations including women, children, communities of color, indigenous communities, and other marginalized or impoverished communities disproportionately suffer from severe weather, increased health problems such as asthma, and lost job opportunities. These impacts fall most heavily on those who have done the least to create the problem and who possess the fewest resources to adapt.

Our notion of the common good calls us to be in solidarity with those impacted by climate change while avoiding the temptation to pass this problem along to future generations as a result of our own neglect or narrow interests. This is why as a nation we must prioritize action on climate.

As we feel the impacts of climate change across the breadth of our ministries, we call on governmental leadership to help us address the root causes of climate change by embracing clean energy. We urge you to co-sponsor the 100% Clean Economy Act of 2019.

Sincerely,

Abundance Farm
