PETITION IN SUPPORT OF THE ARCTIC NATIONAL WILDLIFE REFUGE

As pro-life Christians, we have a special concern for caring for God's majestic creation. As people called to be stewards, we are opposed to seismic testing the Arctic National Wildlife Refuge as it would create lasting scars on creation and damage to valuable wildlife habitat. Tracks from seismic testing in the 1980s can still be seen today. Additional tests would only make the damage worse and harm fragile habitats important for God's creatures such as the caribou. It is time to steward the Arctic as the important piece of God's creation that it is, not destroy it.
