PETITION IN SUPPORT OF THE ENDANGERED SPECIES ACT

As a pro-life Christian, I believe we must faithfully steward what God has created. That is why I support the Endangered Species Act (ESA) and oppose efforts to roll back or weaken it. The ESA is a modern day “Noah’s Ark” that cares for vulnerable species that are important parts of God’s creation. It is also an incredible success story, with nearly all listed species saved from extinction.The ESA makes our communities healthier, as many endangered species are important to pollination, disease regulation, carbon storage, and keeping our water clean. Endangered species and their habitats support natural systems that our farmers, local economies, and communities rely on. I urge you to do all you can to support the life of all endangered species by rejecting any attempts to roll back or weaken the ESA.
